PREFACE

In South Africa, use of coastal areas continues to increase, both for industrial and recreational purposes. Purposeful research into problems of national importance concerning man's use of the sea is supported by the South African National Committee for Oceanographic Research (SANCOR) of the CSIR's Cooperative Scientific Programmes (CSP). One of the programmes administered by SANCOR is the Marine Linefish Programme. (The others being Benguela Ecology, Coastal Processes, Estuaries, Marine Pollution, Marine Sedimentology and Oil Pollution).

The purpose of the Marine Linefish Programme is to direct effort towards increasing the state of knowledge about marine linefisheries in South Africa, so that this information can be used to aid in the development of effective management strategies.

During April 1982, a workshop was held in Durban to assemble and discuss existing knowledge on the biology of important angling fish in South African waters. This document is a product of this workshop and a synthesis of much of the information currently known on these fish. It has been prepared as a working document for the use by scientists and managers alike, to direct research towards providing information needed for the management of South African marine linefish resources when and if this becomes necessary.

ABSTRACT

This document is a syntheses of the current state of knowledge and of research requirements for 84 of the most important of South Africa's angling fish, and has been assembled from individual contributions which were presented at a workshop held in Durban in April 1982. For each species, information is presented on; distribution, angling status, preferred habitat, growth, reproduction, catch statistics and further research work required. The publication is intended to act as a working document and to direct research towards providing information which may be required for the future management of South Africa's marine linefish resource. It is proposed that this document will be periodically revised.

OPSOMMING

Hierdie dokument is 'n samevatting van die huidige stand van kennis en navorsingsbehoeftes sover dit 84 van die belangrikste Suid-Afrikaanse hengelvisse betref. Dit is saamgestel uit individuele bydraes aangebied tydens 'n werksessie wat gedurende April 1982 in Durban gehou is. Inligting aangaande elke spesie word aangebied oor: verspreiding, hengelstatus, voorkeur-habitat, groei, voortplanting, vangs-statistieke en verdere navorsingswerk wat benodig word. Die oogmerk van die publikasie is om te dien as 'n werkdocument en om navorsing te rig na die verskaffing van inligting wat benodig mag word vir die toekomstige bestuur van die Suid-Afrikaanse mariene lynvisbron. Na verwagting sal hierdie dokument periodiek hersien moet word.

TITLES IN THIS SERIES	108

INTRODUCTION: PURPOSE OF DOCUMENT

The difficulty of providing an overview of existing knowledge on the biology of angling fishes was addressed at the Marine Linefish Workshop held at the Oceanographic Research Institute, Durban, on 29/30 April 1982. With the collaboration of all participants, it was agreed that for selected species of importance, all relevant information would be listed. The parameters to be included in this listing were agreed upon, and rapporteurs were appointed to provide information on the various aspects of the fishery along different sectors of the coast (further details are obtainable in the report on the above Workshop).

The submissions were collated by Mr Rudy van der Elst (ORI) and Dr John Wallace (PEM), the documents prepared by CSP and presented to the Marine Linefish Steering Committee at its meeting in Stellenbosch on 3 September 1982. Final review and editing has since occurred, and has resulted in the preparation of this publication.

This publication, becoming known as the 'Visboekie' will serve as a working document to scientists and managers alike, to direct research towards providing information needed for management of South Africa's marine linefish resources when, and if this becomes necessary.

Concurrently, the South African Anglers Union has prepared a list of angling fish in South Africa which they consider to be scarce. This listing was based on extensive experience of anglers, and constitutes a valuable contribution to the knowledge of marine linefish in South Africa. Copies of this listing can be obtained from the South African Anglers Union, and have already been distributed to all participants at the Marine Linefish Workshop (see page 105).

EXPLANATION OF SYMBOLS AND ABBREVIATIONS USED IN TABLES

Occurrence:

The two matrices at the top of each page summarise the occurrence of each of the species, according to geographic area and life stage (large matrix), and portion of coastal zone in which the fish are primarily caught (small matrix).

The following abbreviations have been used in these matrices:

MN Mocambique/South African border northwards
 N * Natal/Transkei : Ponta do Ouro to Kei River
 SEC South East Coast : Kei River to Cape Infanta
 SWC South West Coast : Cape Infanta to Cape Point
 WC West Coast : Cape Point to Orange River
 NN Namibia/South African border northwards

X Presence recorded
 ? Presence unknown
 E Estuarine angling fish
 R/S Rock and Surf angling fish
 O/S Open Sea linefish

* This comprises information mainly of Natal origin

Status

For each of the species, status has been equated with perceived importance as an angling fish, and has been rated as follows:

- Very important/prime importance
- Important
- Moderately important
- Low importance

Research Needs

This most important aspect of the tables was prepared by reviewing all information provided by collaborators. Research needs are identified in terms of the parameters which are most directly relevant to resource management, namely:

- length and weight composition of catches
- length and weight at sexual maturity
- ageing and growth
- spawning areas and seasons
- juvenile nursery areas
- distribution of stocks, residency and migration
- catch per unit effort
- total catch and total effort

Research needs have been given a priority rating to indicate their overall importance to the linefish programme. It must be noted, however that this rating should be viewed together with the amount of work currently underway in setting new research objectives.

This applied or goal-oriented approach to marine linefish research is necessitated by limitations in the financial and manpower resources available and the urgent need to assess whether resource management is required to protect heavily exploited stocks.

ORIGIN OF REFERENCES

The references cited in this document comprise South African published works, results in press, and results in preparation. Foreign references applicable to the occurrence of species outside South African waters have generally been excluded. A full list of references is given on pages 99-103.

CITATION OF INFORMATION CONTAINED IN THIS DOCUMENT

Data included in the tabulations are for information of the linefish research community and not for publication or citation without permission of the author concerned.

PARTICIPANTS AT MARINE LINEFISH WORKSHOP, APRIL 1982Cape Department of Nature and Environmental Conservation

Dr C J Loedolff Private Bag X9086
 CAPE TOWN
 8000

Cooperative Scientific Programmes, CSIR

Mr O A van der Westhuysen P O Box 395
 PRETORIA
 * Dr D A Lord 0001
 Mrs A S Wolvaardt

Fisheries Development Corporation

Mr C A R Bross P O Box 539
 CAPE TOWN
 8000

JLB Smith Institute of Ichthyology

* Prof M M Smith Private Bag 1015
 GRAHAMSTOWN
 6140

Kwazulu Nature and Conservation Department

Mr R Kyle P O Box 43
 KWANGWANASE
 3973

Natal Anti Shark Measures Board

* Mrs B Davis Private Bag X2
 UMHLANGA ROCKS
 4320
 Mr G Charter

Natal Parks, Game and Fish Preservation Board

* Mr M Brokensha P O Box 662
 PIETERMARITZBURG
 3200
 Mr R S Crass

Natal Parks, Game and Fish Preservation Board

Mr F J R Junor P O Box 17090
 CONGELLA
 4013

National Research Institute for Oceanology

Dr A E F Heydorn P O Box 3200
 STELLENBOSCH
 7600

Port Elizabeth Museum

Mr C Buxton P O Box 13147
 HUMEWOOD
 * Dr H M Kok 6013

Mr M J Smale

Dr J H Wallace

Oceanographic Research Institute

Mrs F Adkin P O Box 10712
 MARINE PARADE
 Prof A P Bowmaker 4056

Mr S Chater

Mr G Cliff

Dr A J de Freitas

Mr P A Garratt

Dr G Thurman

Mr R P van der Elst

SA Association for Physical Education and Recreation

* Mr K van der Walt 1131 Church Street
 HATFIELD
 * Mr K Bodenstein Pretoria
 0083

South African Anglers Union

Mr J E D Brunt P O Box 38630
 BOOYSENS
 2016

Sea Fisheries Research Institute

* Dr L Botha Private Bag X2
 ROGGEBAAI
 8012
 Dr R J M Crawford
 Mr H Crouse
 * Mr G de Villiers
 Mr A J Penney
 Dr D E Pollock
 * Mr C Nepgen

University of Cape Town

Dr D S Butterworth Private Bag
 RONDEBOSCH
 7700
 Mr B A Bennett

University of Natal

Dr S J M Blaber Department of Zoology
 P O Box 375
 PIETERMARITZBURG
 3200

University of Port Elizabeth

Prof D Baird Department of Zoology
 P O Box 1600
 PORT ELIZABETH
 6000
 Prof T Erasmus
 Mr C Tregoning

* Invited to the workshop but unable to attend.

TITLES IN THIS SERIES

1. *A description of the Savanna Ecosystem Project, Nylsvley, South Africa. December 1975. 24 pp.
2. *Sensitivity analysis of a simple linear model of a savanna ecosystem at Nylsvley. W M Getz and A M Starfield. December 1975. 18 pp.
3. *Savanna Ecosystem Project - Progress report 1974/1975. S M Hirst. December 1975. 27 pp.
4. Solid wastes research in South Africa. R G Noble. June 1976. 13 pp.
5. *Bibliography on marine pollution in South Africa. D A Darracott and C E Cloete. June 1976. 131 pp.
6. *Recycling and disposal of plastics waste in South Africa. R H Nurse, N C Symington, G R de V Brooks and L J Heyl. June 1976. 35 pp.
7. *South African Red Data Book - Aves. W R Siegfried, P G H Frost, J Cooper and A C Kemp. June 1976. 108 pp.
8. South African marine pollution survey report 1974/1975. C E Cloete and W D Oliff (editors). September 1976. 60 pp.
9. Modelling of the flow of stable air over a complex region. M T Scholtz and C J Brouckaert. September 1976. 42 pp.
10. Methods and machinery for pulverising solid wastes. M J Simpkins. October 1976. 29 pp.
11. *South African Red Data Book - Small mammals. J A J Meester. November 1976. 59 pp.
12. Savanna Ecosystem Project - Progress report 1975/1976. B J Huntley. March 1977. 41 pp.
13. Disposal and recovery of waste paper in South Africa. G R de V Brooks. April 1977. 35 pp.
14. South African Red Data Book - Fishes. P H Skelton. July 1977. 39 pp.
15. A checklist of the birds of the Nylsvley Nature Reserve. W R Tarboton. September 1977. 14 pp.
16. *Grondsoorte van die Nylsvley-natuurreservaat. H J von M Harmse. September 1977. 64 pp.
17. Description and manual for the use of DRIVER - an interactive modelling aid. P R Furniss. September 1977. 23 pp.

18. South African Red Data Book - Large mammals. J D Skinner, N Fairall and J du P Bothma. November 1977. 29 pp.
19. Introducing you to satellite operated Data Collection Platforms (DCP's). C C Stavropoulos. September 1977. 9 pp.
20. A phytosociological classification of the Nylovley Nature Reserve. B J Coetzee, F van der Meulen, S Zwanziger, P Gonsalves and P J Weisser. December 1977. 31 pp.
21. An annotated checklist of the amphibians, reptiles and mammals of the Nylovley Nature Reserve. N H G Jacobsen. December 1977. 65 pp.
22. *Cooperative National Oceanographic Programme. SANCOR. January 1978. 19 pp.
23. South African Red Data Book - Reptiles and amphibians. G R McLachlan. February 1978. 53 pp.
24. *Guidelines for the disposal of dangerous and toxic wastes so as to minimize or prevent environmental and water pollution. R T Rudd. January 1978. 12 pp.
25. Richards Bay mesometeorological data. Vertical profiles of air temperatures and wind velocity and surface wind statistics. M T Scholtz, E T Woodburn, C J Brouckaert and M Mulholland. March 1978. 104 pp.
26. *Studies of mineralization in South African rivers. G C Hall and A H M Gorgens (editors). March 1978. 24 pp.
27. Nylovley - A South African Savanna Ecosystem Project: objectives, organization and research programmes. March 1978. 37 pp.
28. *A description of the Fynbos Biome Project. June 1978. 25 pp.
29. *Savanna Ecosystem Project - Phase I summary and Phase II progress. B J Huntley and J W Morris. July 1978. 52 pp.
30. *Review of Coastal Currents in Southern African Waters. T F W Harris. August 1978. 106 pp.
31. *Report of the Task Group on Fermentation Technology. R J Andrews, J A de Villiers, P M Lategan, F G Neytzell-de Wilde, J P van der Walt, and Professor D R Woods. September 1978. 16 pp.
32. South African programme for the SCOPE mid-term project on the ecological effects of fire. September 1978. 36 pp.
33. Fire in South African ecosystems: an annotated bibliography. G U Schirge and A H Penderis. October 1978. 114 pp.
34. *Inland water ecosystems in South Africa: a review of research needs. R G Noble and J Hemens. November 1978. 150 pp.

35. *South African Antarctic Research Programme, 1978-1982. SASCAR. December 1978. 39 pp. Out of print but partially replaced by No. 50.
36. *Aboveground biomass subdivisions in woody species of the Savanna Ecosystems Project Study Area, Nylsvley. M C Rutherford. January 1979. 33 pp.
37. *Marine Line Fish Research Programme. SANCOR. April 1979. 17 pp.
38. *The Southern Ocean - South African Cooperative Research Programme. SANCOR. May 1979. 26 pp.
39. The Transfer of Pollutants in two southern hemispheric oceanic Systems. Proceedings of a workshop held at Plettenberg Bay, South Africa, 23-26 April 1979. October 1979. 188 pp.
40. Fynbos ecology: a preliminary synthesis. J Day, W R Siegfried, G N Louw and M L Jarman. December 1979. 166 pp.
41. *Bibliography of Marine Biology in South Africa. D A Darracott and A C Brown. February 1980. 250 pp.
42. Advances in understanding phosphorus cycling in inland waters - their significance for South African limnology. A J Twinch and C M Breen. March 1980. 22 pp.
43. Terrestrial ecology in South Africa - project abstracts for 1978. February 1980. 92 pp.
44. A manual of methods for use in the South African Marine Pollution Monitoring Programme. R J Watling. July 1981. 82 pp.
45. Threatened plants of Southern Africa. A V Hall, M de Winter, B de Winter and S A M van Oosterhout. May 1980. 244 pp.
46. South African legislation with respect to the control of pollution of the sea. André Rabie. January 1981. 73 pp.
47. Terrestrial ecology in South Africa and South West Africa - project abstracts for 1979. May 1981. 107 pp.
48. A bibliography of seabirds in the waters of southern Africa, the Prince Edward and Tristan Groups. J Cooper and R K Brooke. December 1981. 297 pp.
49. National Geoscience Programme. The Evolution of Earth Resource Systems. SACUGS. June 1981. 42 pp.
50. South African Antarctic Biological Research Programme. SASCAR. July 1981. 54 pp.
51. South African Marine Pollution Monitoring Programme 1979-1982. R J Watling and C E Cloete (editors). July 1981. 52 pp.

52. Structural characterization of vegetation in the Fynbos Biome. B M Campbell, R M Cowling, W J Bond and F J Kruger in collaboration with D P Bands, C Boucher, E J Moll, H C Taylor and B W van Wilgen. August 1981. 19 pp.
53. A bibliography of fynbos ecology. M L Jarman, R M Cowling, R Haynes, F J Kruger, S M Price and G Moll. August 1981. 73 pp.
54. A description of the Benguela Ecology Programme 1982-1986. SANCOR: (W R Siegfried and J G Field editors). March 1982. 39 pp.
55. Trophic ecology of Lepidoptera larvae associated with woody vegetation in a savanna ecosystem. C H Scholtz. June 1982. 38 pp.
56. Man and the Pongola floodplain. J Heeg and C M Breen. June 1982. 117 pp.
57. An inventory of plant communities recorded in the western, southern and eastern Cape Province, South Africa up to the end of 1980. C Boucher and A E McDonald. September 1982. 58 pp.
58. A bibliography of African inland water invertebrates (to 1980). B R Davies, T Davies, J Frazer and F M Chutter. September 1982. 418 pp.
59. An annotated checklist of dung-associated beetles of the Savanna Ecosystem Project study area, Nylsvley. S Endrödy-Younga. September 1982. 34 pp.
60. The termites of the Savanna Ecosystem Project study area, Nylsvley. P Ferrar. September 1982. 42 pp.
61. Conservation of Ecosystems: Theory and Practice. A report on a workshop meeting held at Tsitsikama, South Africa, September 1980. Edited by W R Siegfried and B R Davies. September 1982. 97 pp.
62. A description of the Grassland Biome Project. Edited by M T Mentis and B J Huntley. October 1982. 29 pp.
63. Description of a fire and its effects in the Nylsvley Nature Reserve: A Synthesis Report. M V Gandar. October 1982. 39 pp.
64. Terrestrial ecology in South Africa - project abstracts for 1980-1981. December 1982. 148 pp.
65. Alien invasive vascular plants in South African natural and semi-natural environments: bibliography from 1830. V C Moran and P M Moran. December 1982. 42 pp.
66. Environmental Research Perspectives in South Africa. December 1982. 39 pp.
