

NANOLCA Symposium, "Safety issues and regulatory challenges of nanomaterials", San Sebastian, Spain, 3-4 May 2012

Post engineered nanomaterials lifespan: nanowastes classification, legislative development/implementation challenges, and proactive approaches

Musee N

CSIR. Natural Resources and the Environment. PO Box 395, Pretoria, 0001

Abstract

This presentation defines nanowastes, analyses its lifecycle, classifies it and states its management challenges. The classification looks at application hazards, exposure potency and risk of disposal.
